Docket No. AUS920040060US1

ABSTRACT OF THE DISCLOSURE**METHOD AND APPARATUS FOR AUTONOMIC TEST CASE FEEDBACK
USING HARDWARE ASSISTANCE FOR CODE COVERAGE**

A method, apparatus, and computer instructions for presenting coverage data for code. The coverage data containing instruction access indicators associated with the code is obtained. Particular instruction access indicators that have been set by a processor in the data processing system in response to execution of the code by the processor are identified to form set instruction access indicators. Each set instruction access indicator is associated with a portion of the code. A presentation for the coverage data is generated. The set instruction access indicators are identified in the presentation. This presentation may be, for example, a graphical presentation.
